

API Documentation

NOTE: All requests will begin with <http://127.0.0.1:8000/api/> and I will put in the url just what comes after base url.

Customers:

Index Response:

```
"data": [  
  {  
    "firstname": "omar",  
    "lastname": "AlMidani",  
    "phonenumber": "0938403588",  
    "address": "somewhere"  
  }  
],  
"meta": {  
  "per_page": 10,  
  "count": 1,  
  "current_page": 1,  
  "path": "http://127.0.0.1:8000/api/customers",  
  "from": 1,  
  "to": 1,  
  "prev": null,  
  "next": null  
},  
"message": "Customers indexed successfully",  
"status": 200
```

Show Response:

```
"data": {  
  "firstname": "omar",  
  "lastname": "AlMidani",  
  "phonenumber": "0938403588",  
  "address": "somewhere"  
},  
"message": "Successful",  
"status": 200
```

| NAME OF Request | Method | URL | Body | URL's Parameters |
